

SUMMARY

Data Analytics professional with 7+ years of experience leveraging data to drive business insights, improve operational efficiency, and support strategic decision-making across financial services, insurance, and technology sectors. Experienced in data analysis, business intelligence, reporting, and data governance, with strong expertise in Power BI, SQL, Tableau, Excel and ETL processes. Proven ability to analyze complex datasets, develop interactive dashboards, define and track KPIs, and deliver actionable insights to stakeholders.

EDUCATION

MSc Business Analytics, Ireland
University of Galway – 2:1 Honors

Sept 2022 – July 2023

Bachelor Of Engineering Information Technology, India
KJ Somaiya College of Engineering – 2:1 Honors

June 2014– May 2018

WORK EXPERIENCE

Data Analyst – Gateway Credit Union, Ireland

October 2023 – present

- Designed and maintained Power BI dashboards and reports for AML compliance, operational monitoring, and executive reporting, enabling data-driven decision-making.
- Developed and managed an end-to-end reporting pipeline from on-premises SQL Server databases to Power BI Service using the Microsoft On-Premises Data Gateway, enabling automated data refreshes and reliable reporting.
- Built and optimized data models, DAX measures, and Power Query transformations to improve reporting accuracy, performance, and scalability.
- Performed data validation, reconciliation, and quality assurance activities to ensure data integrity and compliance with governance and regulatory requirements.
- Created and maintained metric inventories, KPI definitions, reporting documentation, SOPs, and process flows to support reporting governance and audit readiness.
- Analyzed large transactional datasets to identify trends, anomalies, risks, and business insights, improving operational efficiency and regulatory reporting accuracy.
- Developed Excel-based dashboards and reporting solutions using Power Pivot, Power Query, and advanced Pivot Tables to support business analysis and management reporting.
- Collaborated with business and technology stakeholders to gather requirements, manage reporting enhancements, resolve data issues, and deliver reporting and analytics solutions.

Data Analyst – Coverfox, India

Nov 2021 – July 2022

- Analyzed insurance data across term, motor, and bike products using Tableau and SQL, developing 10+ interactive dashboards that identified business trends, customer behavior patterns, and performance opportunities for marketing and sales teams.
- Extracted, transformed, and analyzed large datasets from Amazon Redshift using advanced SQL queries, generating actionable insights and supporting strategic decision-making across business functions.
- Developed and maintained KPI dashboards and reporting frameworks using Tableau and Microsoft Excel, providing monthly performance reporting, metric tracking, and business insights to key stakeholders.
- Worked within Agile delivery teams to support product enhancements, manage reporting requirements, and drive continuous improvement initiatives across analytics and business operations.

Consultant – CrmNext, India

July 2021 – Nov 2021

- Configured and enhanced CRM solutions to automate data capture, improve data quality, and streamline customer information management, reducing manual administrative effort and improving operational efficiency.
- Collaborated with business stakeholders to gather and document requirements, define project scope, and develop work breakdown structures (WBS), contributing to improved project planning and delivery timelines.
- Developed detailed swim lane diagrams using Bizagi to visualize workflows, pinpoint bottlenecks, and facilitate operational enhancements
- Oversaw the migration of new product features across three environments—UAT, Pre-Production, and Production—ensuring seamless deployment and quality control.

Technical Business Analyst – Daifuku, India/Japan

July 2018 – June 2021

- Captured and translated business requirements into technical design specifications for an inventory management system.
- Participated in all phases of the SDLC across 4 projects, from requirements gathering to UAT and deployment, ensuring 100% alignment between business needs and technical deliverables.
- Created and implemented a standardized Functional Requirements Document (FRD) template, improving collaboration and clarity across business and technical teams
- Gathered user feedback and documented change requests post-deployment, driving continuous improvement and delivering 20+ incremental system updates.
- Conducted training sessions and created user guides for business users post-launch, improving adoption rates and reducing support tickets by 15%.
- Partnered with cross-functional teams to analyze inventory data using SQL and Power BI tools, reducing report generation time through streamlined reporting workflows

SKILLS

- **Core Competencies:** Business Analysis, Requirement Gathering, BRD/FRD/SRS Documentation, User Stories, Stakeholder Management, Process Mapping, Root Cause Analysis.
- **Data & Analytics:** Advanced SQL, Advanced Excel, Power BI, Tableau, Power Query, Data Modeling.
- **Systems & Tools:** CRM Systems, Jira, Visio, Miro, Amazon Redshift, Oracle.
- **Automation & Microsoft Stack:** SharePoint, Power Automate, Power Apps.
- **Frameworks & Methodologies:** Agile (Scrum, Kanban), SDLC, Six Sigma, CRISP-DM
- **Programming Languages:** Python, R, C#.
- **Python Libraries:** Pandas, NumPy, matplotlib, seaborn, sci-kit learn.

CERTIFICATIONS AND AWARDS

- Advanced SQL (HackerRank)
- Certified Scrum Product Owner (CSPO)
- Certified Scrum Master (CSM)
- Lean Six Sigma Green Belt

EXTRACURRICULAR

- Vice Auditor at Business Analyst Society, University of Galway.
Conducted analytical workshops for a group of 40+ students and held Seminars from industry experts.
- OCM at Indian Society, University of Galway.
Orchestrated 3 traditional and cultural events for 500+ students over the Academic year.
